Palakkad , kerala , India

SKILLS

- HTML5
- CSS3
- SCSS
- JavaScript
- Bootstrap
- Tailwind CSS
- React JS
- Next JS
- Node JS
- MongoDB
- Git & GitHub

EDUCATION

Bsc.Computer Science

College Of Applied Science, Kuzhalmannam

2018 - 2021

LANGUAGES

- English
- Tamil
- Malayalam

ABOUT ME

A self-taught MERN stack developer with 1 years of experience, I am passionate about focusing more on the front end, particularly in React js. I am self-trained in handling the backend with Node js and MongoDB.

WORK EXPERIENCE

React JS Developer — 01/2023- 06/2023

VASS SYSTEMS

Full-Time

- Worked closely with senior developers to understand project requirements and translate them into responsive and interactive user interfaces. Developed pixel-perfect, cross-browser compatible UI components using HTML5, CSS3, and JavaScript frameworks such as React.js or NextJS. Implemented front-end logic and functionality using JavaScript, including event handling, DOM manipulation, and AJAX requests for dynamic content loading
- Conducted thorough testing and debugging of front-end code to identify and resolve issues, ensuring high quality and performance standards. Participated in code reviews and version control using Git, contributing to the maintenance and improvement of codebase organization and documentation
- learning and professional development, staying updated on the latest frontend technologies, best practices, and design trends. Demonstrated strong problem-solving skills and a proactive attitude towards learning and selfimprovement, contributing to the success of team projects and objectives.
- Assisted in the optimization of web applications for maximum speed and scalability, ensuring seamless user experiences across different devices and browsers.

Trainee In Mern Full Stack — 06/2022- 12/2022

Softroniics

Full-Time

- Engaged in a comprehensive training program focused on mastering the MERN (MongoDB, Express.js, React.js, Node.js) stack, a cutting-edge technology suite for full-stack web development.
- Collaborated with senior developers to understand project requirements, codebase management, and version control using Git.
- Participated in the design and development of dynamic web applications utilizing React.js for front-end development, Node.js for server-side scripting, and MongoDB for database management.

SOCIAL LINKS

linkedin.com/in/arjundeveloper

/github.com/Arjunarunachalan

- Collaborated with cross-functional teams to deliver high-quality software solutions within project timelines and specifications.

- Demonstrated proficiency in front-end technologies including HTML5, CSS3, and JavaScript to create responsive and visually appealing user interfaces
-
- Gained hands-on experience in RESTful API development with Express.js, integrating server-side logic and data storage.

PROJECTS

Scaleup Conclave

view

Technologies: HTML5, SCSS, Tailwind CSS, Axios, Next JS, MongoDB

- It is the first edition of an annual celebratory platform that fuses you with entrepreneurs, investors, professionals, and business enthusiasts. Developed the UI for landing page and registration. Developed REST APIs to save the registration data in MongoDB.
- Developed reusable parts for the user interface, making it easier to build and maintain.
- Orchestrated seamless API integration, facilitating smooth communication between various system components and external services.
- Conducted code reviews to maintain high standards of quality, reliability, and security in the project's codebase.

Auto Admin

view

Technologies: HTML5, SCSS, Tailwind CSS, Axios, React JS, MongoDB

- A user-friendly CMS (Content Management System) offering automated admin panel creation without requiring any coding skills, streamlining website management effortlessly.
- Significantly contributed to the development of an intuitive CMS platform focused on automatic admin panel generation, revolutionizing website management without the need for coding expertise. Solely tasked with developing the frontend development using React S, ensuring a seamless user experience with customizable widgets and streamlined deployment options. Implemented reusable UI components to simplify interface construction and maintenance, enhancing overall efficiency.

- Enhanced the AutoAdmin platform by developing frontend UI components using React JS and Tailwind CSS, optimizing user experience and simplifying administrative tasks.

Reliva Global

view

Technologies: HTML5, SCSS, Tailwind CSS, Next JS, MongoDB

- Contribute to the development of a web 3.0 project at Reliva Global, specializing in cryptocurrency, NFT trading, and referral reward systems. Took charge of crafting the entire frontend of the application using Next.js, ensuring a seamless and engaging user experience.

- Contributed to crafting a seamless user experience while learning and growing within the frontend development team.
